Introduction

Welcome to Riwatex - an innovative futures cryptocurrency exchange where modern features combine with reliability for your comfort and success.

Our operations are lightning-fast, providing instant response to market changes and the ability to make winning decisions without delays. We take pride in cutting-edge technologies that ensure impeccable protection of your funds and the confidentiality of your data.

At Riwatex, you will gain access to unique market analysis tools, including advanced charts and indicators that help you make informed investment decisions.

Security

Riwatex employs a range of measures that collectively provide an increased level of protection, including:

- Riwatex implements multi-level authentication to provide an additional layer of protection when logging into the account.
- In case of detecting suspicious activity on user accounts, Riwatex takes immediate action to prevent potential threats and informs users about it.
- The Riwatex security team continuously monitors changes in cyber threats and adapts its protection methods accordingly to ensure maximum security for users.

Liquidity

The liquidity problem of a cryptocurrency exchange lies in the lack of available funds and assets for conducting transactions of buying and selling digital currencies. This often leads to significant price fluctuations, hinders the execution of large deals, and increases the gap between buying and selling prices.

Insufficient liquidity can also cause issues with order processing and make the platform less appealing to traders. This, in turn, can deter potential investors and limit trading activity on the exchange.

To address the liquidity issue, Riwatex utilizes liquidity aggregation methods by exchanging information with other exchanges. Additionally, Riwatex has a unique capability to launch applications on an innovative fast blockchain, which opens up new horizons for creating high-performance and secure applications. This provides companies with the opportunity to leverage cutting-edge technologies without the need for a complex listing process and offers users innovative possibilities in the world of cryptocurrencies and decentralized applications.

Infrastructure

Many cryptocurrency exchange platforms face challenges in scaling their systems and ensuring the reliability of their technical infrastructure. To address these infrastructure issues, Riwatex actively applies cutting-edge technologies and security methods. We implement comprehensive monitoring, focus on reducing the risks of technical failures, and continuously enhance our technical foundation to ensure a reliable and stable platform operation.

Riwatex Token

RTX - Utility token used within the Riwatex ecosystem.

Ways of application:

1. Trading RTX/USDT will be available to all users.
2. By paying trading fees in RTX, users will receive discounts of up to 50%.
3. Holding RTX in the balance, the user can receive several free cryptocurrency withdrawals through any of the available networks.
4. Holding RTX in the balance, the user can receive increased earnings through referral and partnership programs.
5. Holding RTX provides users with advantages in new Airdrop events.

Unique Value Proposition

Unlike other Utility tokens, the RTX token can be earned through a Play-to-Earn model. Token mining occurs during the RTX Game, which is presented as an application on the Telegram messenger. Each user has equal opportunities for farming RTX.

- The maximum token supply is limited to 6,480,000,000,000 RTX.
- 72% of the tokens will be distributed to users playing the RTX Game.
- 28% of the tokens will remain in Riwatex for ecosystem development and the community.

We initially incorporate a token burning mechanism to further reduce the emission size to 100 000 000 000 RTX.

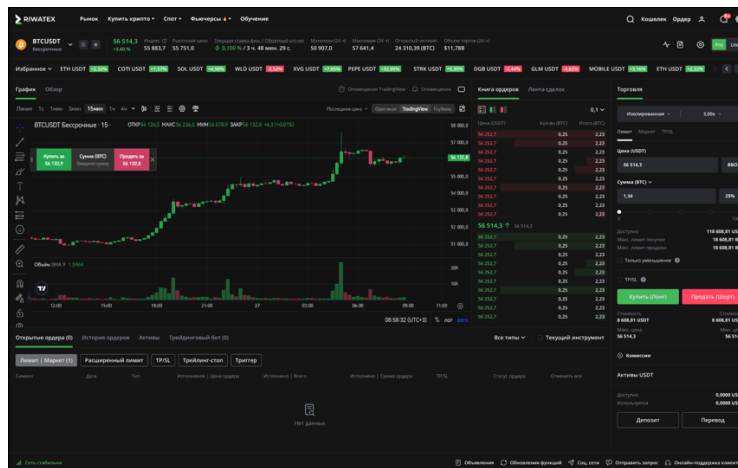

Emission and Distribution of RTX

№	Purpose	%	Number of token
1	Total maximum number of RTX tokens from Riwatex	100%	6 480 000 000 000 RTX
2	Mined by users playing Riwatex Game	72%	4 665 600 000 000 RTX
3	Remains within Riwatex	28%	1 814 400 000 000 RTX
3.1	<i>Ecosystem fund. The funds will be used for ecosystem development and growth.</i>	12%	777 600 000 000 RTX
3.2	<i>Community incentivization and development. Increasing community engagement and activity.</i>	12%	777 600 000 000 RTX
3.3	<i>Technological development. Development, research, enhancement of security systems and product quality.</i>	4%	259 200 000 000 RTX

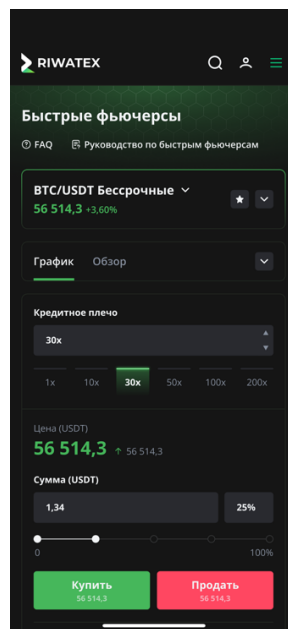

Revenue model

Source	Description
Commission for opening a position	Riwatex will initially charge a commission based on the Taker/Maker model ranging from 0.01%.
Commission for withdrawal	Riwatex will charge a fee for cryptocurrency withdrawals based on network congestion.
Commission for margin collateral	If you are trading on margin, there may be a commission or interest charged on the loan amount.
Other fees	Riwatex may charge additional fees for various services. All fees are disclosed before providing the service.

User Interface review (UI)

Professional web interface for trading

Mobile web interface for trading

Roadmap

Date	Stage
Dec 2023	Development start of the platform riwatex.com
Feb 2024	Closing of the first round of funding from private investors
Q2 2024	Launch of the Riwatex Game application by Riwatex
Q3 2024	Adding a wallet to the Riwatex Game application by Riwatex
Q3 2024	Releasing the RTX token on the TON blockchain
Q3 2024	Opening Trading section and listing the RTX/USDT pair in the Riwatex Game application by Riwatex
Q3 2024	Opening RTX deposit and withdrawal on the TON-TON Network
Q4 2024	Development of the Riwatex ecosystem within the Riwatex Game mini-app.

Conclusion

The project was announced on 30.08.2024. The upcoming updates will be reflected in document version 1.3.
